NATIONAL SEMINAR

on .

INDUSTRY 4.0

Emerging Opportunities and Challenges in India's Financial Sector

Organised by:

Jagannath International Management School

Kalkaji, New Delhi

The National Finance Seminar 2019 is being organized by Jagannath International Management School, Kalkaji, New Delhi in collaboration with the Indian Economic Association, New Delhi.

Background

Microsoft Artificial Intelligence is fueling digital transformation for over 700 customers and 60 per cent of these customers are large manufacturing and financial services enterprises. The application of Artificial Intelligence and Machine Learning to different functions within the financial service industry has enabled them to offer a far more personalized and efficient customer service.

Industry 4.0 helps to communicate machine and products with each other through artificial intelligence and machine learning. It combines and helps to connect all stakeholders with ease. Financial sector, the life line of any economy can ensure higher and sustainable growth with incorporation of artificial intelligence and machine learning as it helps to reduce transaction cost, mitigate credit risk and enhance customer relationship management.

The financial industry is experiencing unprecedented disruption with acquisition of technology by financial service providers, startups, evolving regulatory changes, increasing incidents of cyber-crime, mandates to reduce costs and deliver efficiencies across the enterprise, and expectations to deliver better customer experiences Hence the immense opportunity for the financial service institutions is digital innovation and transformation, both internally and externally which enhances customer value addition and employee engagements and at the same time reduces operational costs and increases..

Objectives

The key objectives of seminar are:

- To enhance awareness of how Industry 4.0 is going to make an impact on financial systems equipped with humanoids and Chabot's.
- To develop insights into the extent of block chain contribution to risk mitigation in financial institutions.
- To analyze the tradeoff between probability of technology driven frauds over cost reduction and optimization of financial services.

Theme Areas

- Industry 4.0: Emerging Opportunities and Challenges in India's Financial Sector
- Artificial Intelligence: A Gateway to Customer Interaction for Financial Service
- Financial Technological Innovation: A Facilitator for Fraud Detection.
- Machine Learning: ANew Business Growth Model for Wealth Management and Insurance Service Institutions.

Target Participants

The seminar is intended for bankers, NBFCs, fintech companies and also for academicians, management students and research scholars to enhance their knowledge and develop perspectives on Industry 4.0 and the Indian financial sector.
